Jim,

Are you providing comments for this one? I looked over it before the shutdown a bit, and it seemed to adequately address potential wetland impacts, and the West alternative, the only one with wetland impacts, is not likely to be a preferred alternative. Nothing really stood out to me.

I'm heading to Lafayette next week for Dr. Mohlenbrock's plants course, but I'll bring my computer and check email and such.

Hope you made the most of the shutdown.

Alison
